Summary

Software Engineering graduate (GPA 3.9/4.0, Dean's List) and self-driven Front-End Developer with a proven track record of shipping real, deployed web applications. Skilled in HTML5, CSS3, modern JavaScript (ES6+), React, TypeScript, and Tailwind CSS - with three live projects on GitHub Pages demonstrating clean component architecture, responsive design, and strong attention to UI detail. Passionate about writing maintainable code and building things that actually work.

Experience

Freelance / Personal Projects - Front-End Developer

Muscat, Oman | 2025 - Present

TypeRush - Typing Speed Test

Jun 2026 | Tech Stack: React | Tailwind CSS | Framer Motion | Vite | Web Audio API

- * Architected and deployed a real-time typing speed test in React - handling live WPM/accuracy calculations, custom sound effects via the Web Audio API, animated UI with Framer Motion, and seamless mobile keyboard support - shipped to GitHub Pages with zero dependencies on audio libraries.

Task Manager Application

Oct 2025 - Nov 2025 | Tech Stack: HTML | CSS | JavaScript | LocalStorage

- * Engineered a fully functional task management app from scratch - pure HTML, CSS, and JavaScript, no frameworks - delivering CRUD operations, real-time filtering, and persistent state via LocalStorage, deployed live with a polished soft UI aesthetic.

[Live Demo](#) | [GitHub](#)

Personal Portfolio Website

Aug 2025 - Present | Tech Stack: React | TypeScript | Tailwind CSS | Framer Motion

- * Designed and shipped a production-ready personal portfolio with React, TypeScript, and Tailwind CSS, achieving smooth 60fps animations via Framer Motion and full cross-device responsiveness - publicly deployed and used as a primary professional presence.
